Subject and Author Index to Volume 27

Abstracts, from Nutrition Week 2003, S1 (Jan–Feb)
Acridine orange leukocyte cytospin, as *in situ* test for catheter-related bloodstream infections, 146
Activator protein-1–associated gene transcription, MAP kinases signaling and, 176
Alanine, muscle protein response to, 307
Albumin
  breast cancer survival and, 10
  postoperative complications and preoperative, 1
Amino acids, branched chain, nocturnal *versus* daytime administration of, 315
Anorexia nervosa, nasogastric tube feeding in, 268
Antioxidants, enteral feeding in acute respiratory distress syndrome and, 98
Arginine, phagocytosis in sepsis and, 235

Basic fibroblast growth factor, PC4/TIS7 regulation and, 123
Bioelectrical impedance analysis, of energy expenditure in hospitalized patients, 43
Body composition, of neonates, 423
Body mass index
  obesity classification and, 340
  pediatric height and weight charts and, 440 (Editorial)
Body weight, noncompliance with measurement of, 89
Bone mineral density (BMI), tacrolimus and prednisone effects after liver transplantation on, 427
Breast cancer
  glutamine in DMBA-induced, 411
  glutamine supplementation and PI-3K/Akt signaling in, 404
  serum albumin and prognosis for, 10
Burns, supplemental enteral glutamine and, 241

Caco-2 cells, glutamine-supplemented, 333
Calorimetry, indirect
  clinical use of respiratory quotient from, 21
  steady state achievement and, 16
Canada, clinical practice guidelines for critically ill patients in, 355, 385 (Editorial)
Cancer, eicosapentaenoic acid modulation of ubiquitin-proteasome proteolytic pathway in, 105
Cardiomyocytes, glutamine for myocardial ischemia-reperfusion injury and. 116
Cardiopulmonary bypass, glutamine and, 396
Catheter-related bloodstream infections, *in situ* test for, 146
Cecal cells, disaccharide malabsorption and proliferation in piglets of, 323
Certified nutrition support dietitians
  evaluation by survey of, 287
  perceived benefit and therapy differences from, 282
Chicken soup, nutrition support and, 93 (Editorial)
Children
  nutrition support for, 160
  obesity in, 440 (Editorial)
  resting energy expenditure with cyanotic and noncyanotic congenital heart disease, 47
Cirrhosis, liver, vitamin E assessment before transplantation and, 71
Clinical trials
  of patient education and home parenteral nutrition complications, 137
  of pump-assisted *versus* gravity-controlled enteral nutrition in long-term PEG patients, 216
  of supplemental enteral glutamine effects with burns, 241
Colonic anastomoses, glutamine and healing of, 182
Congenital heart disease, resting energy expenditure in children with cyanotic and noncyanotic, 47
Credentialing
  perceived benefit and therapy differences from, 282
  survey measurements of, 287
Critically ill patients
  Canadian clinical practice guidelines for nutrition support in, 355, 385 (Editorial)
  concentrated lipid emulsion for, 208
  indirect calorimetry and steady state achievement in, 16
  muscle protein response to amino acids for, 307
  nutrition support in intensive care units, 74
  nutrition support technology and, 383 (Editorial)
  paracetamol concentration, feeding tube placement and, 151
  procalcitonin and enteral nutrition tolerance in, 84
Cystic fibrosis, ω-3 fatty acid treatment, 52
Cytokines, glutamine-supplemented Caco-2 cells and, 333

7,12-Dimethylbenz[a]anthracene (DMBA), glutamine and breast cancer induced by, 411
Disaccharide malabsorption, weight gain and cecal cell proliferation in piglets and, 323

Eicosapentaenoic acid
  enteral feeding in acute respiratory distress syndrome and, 98
  ubiquitin-proteasome proteolytic pathway modulation by, 105
Endoscopy, transnasal feeding tube placement in ICU patients and, 349
End-stage renal disease, resting energy expenditure increases with, 36
Energy expenditure
  bioelectrical impedance analysis of, 43
  neuromuscular blockade effect with head injuries and, 27
Enteral nutrition
  acute respiratory distress syndrome and, 98
  procalcitonin in critically ill patients and tolerance of, 84
  pump-assisted *versus* gravity-controlled, 216
Epidermal growth factor, PC4/TIS7 regulation and, 123
Epithelial cells, keratinocyte growth factor after small bowel resection and, 198

Fan beam dual X-ray absorptiometry, for body composition of neonates, 423
Fatty acids
  clinical aspects of metabolism of, 168
  in cystic fibrosis patients, 52
  MAP kinases signaling and, 176
Feeding tubes
  placement of transnasal endoscopic in ICU patients, 349
  serum paracetamol concentration and placement, 151
Food and Drug Administration, vitamin K inclusion requirements for parenteral nutrition, 220

Gastric bypass, popularity of, 156 (Editorial)
Gastric electrical stimulation, for gastroparesis, 277, 386 (Editorial)
Gastroparesis, gastric electrical stimulation for, 277, 386 (Editorial)
Glutamine
  Caco-2 cells supplementation with, 333
  cardioprotection in myocardial ischemia-reperfusion injury and, 116
  in DMBA-induced breast cancer, 411
  healing colonic anastomoses in rats and, 182
  for ICU patients, 302 (Editorial)
  ischemia-reperfusion injury and, 187, 396
  ischemia-reperfusion injury from parenteral nutrition and, 110
  muscle protein response to, 307
  PI-3K/Akt signaling in experimental breast cancer and, 404
  severe burns and, 241
Growth hormones, early postnatal food restriction and secretion of, 260

Head injuries, severe, neuromuscular blockade effect on energy expenditure with, 27
Healthcare
  cost for quality in, 300 (Editorial)
  delivery of, 232 (Editorial)
Healthcare costs
  certified nutrition support dietitians and, 282
  quality and, 300 (Editorial)
  survey measurements of, 287
Health personnel, shortages of, 232 (Editorial)
Hemodialysis, resting energy expenditure increases with, 36
Hemorrhagic shock, glutamine in TPN and, 246
History, medical. *See* Rhoads (Jonathan) Symposium Papers
Home parenteral nutrition, patient education and complications with, 137
Hospitals
  noncompliance with body weight measurement during admission to, 89
  prealbumin and nutritional screening in, 389
Hypokalemia, in short bowel syndrome, 305 (Letter)

Infants, newborn
  fan beam dual X-ray absorptiometry for body composition of, 423
  nitrogen excretion after digestive tract surgery for, 327
Infections, *in situ* test for catheter-related bloodstream, 146
Insulin-like growth factor 1, PC4/TIS7 regulation and, 123

Intensive care unit
glutamine to patients in, 302 (Editorial)
nutrition support in, 74
transnasal endoscopic feeding tubes placement in, 349
Intestinal transplantation, nutritional autonomy after, 252
Ischemia-reperfusion injury
alanyl-glutamine–supplemented parenteral nutrition and, 110
glutamine cardioprotection in myocardial, 116
glutamine effects after, 396
glutamine infusion and, 187

Joint Commission for Accreditation of Health Care Organizations, guidelines in at-risk patients, 288

Keratinocyte growth factor, epithelial function after small bowel resection and, 198

Leptin, acute protein deprivation and, 132
Linoleic acid, clinical aspects of metabolism of, 168
A-linoleic acid, clinical aspects of metabolism of, 168
γ-Linolenic acid, enteral feeding in acute respiratory distress syndrome and, 98
Lipid emulsions
concentrated, for critically ill patients, 208
particle size and composition effects of, 58
Liver cirrhosis, nocturnal *versus* daytime protein administration in, 315
Liver transplantation, tacrolimus and prednisone effects on BMI after, 427

Malnutrition
growth hormone secretion and postnatal, 260
intestinal failure, TPN and, 374
refeeding and NF-κB downregulation, 193
serum leptin and protein energy, 132
MAP kinases, ω-3 fatty acid inhibition of signaling by, 176
Medical history
parenteral nutrition development, 225
total parenteral nutrition development, 291
TPN with intestinal failure and malnutrition, 374
3–0 Methylglucose absorption, in experimental short bowel syndrome, 65

N-acetyl-l-tyrosine (NAT), as parenteral nutrition source of tyrosine, 419
Nasogastric tubes, for feeding in anorexia nervosa, 268
Nerve growth factor, PC4/TIS7 regulation and, 123
Neuromuscular blockade, effect on energy expenditure with severe head injury, 27
Nitrogen excretion, in newborn infants after digestive tract surgery, 327
Nuclear factor-κ B (NF-κB), refeeding and restriction-induced downregulation of, 193
Nutrient absorption, in experimental short bowel syndrome, 65
Nutrient support, for children, 160
Nutritional screening, prealbumin and, 389
Nutritional status
after intestinal transplantation, 252
gastric electrical stimulation for gastroparesis and, 277, 386 (Editorial)
postoperative complications, surgical site and, 1
Nutrition support
bioelectrical impedance analysis of energy expenditure with, 43
Canadian clinical practice guidelines for critically ill patients of, 355, 385 (Editorial)
chicken soup paradigm and, 93 (Editorial)
clinical use of respiratory quotient for, 21
for ICU patients, 302 (Editorial)
in intensive care units, 74
JCAHCO guidelines on assessing at-risk patients for, 288
nocturnal *versus* daytime administration of, 315
technology for feeding critically ill patients, 383 (Editorial)

Obesity
body mass index and degree of, 340
in children, 440 (Editorial)
surgery for, 156 (Editorial)

Paracetamol, feeding tube placement and serum levels of, 151
Parenteral nutrition. *See also* Home parenteral nutrition; Total parenteral nutrition
FDA requirements for vitamin K inclusion in, 220
history of, 225
ischemia-reperfusion injury with alanyl-glutamine–supplemented, 110
N-acetyl-l-tyrosine as tyrosine source in, 419
pulmonary microcrystalline cellulose deposition from IV injection of oral medication and, 91
Patient education, home parenteral nutrition complications and, 137
PC4/TIS7, growth factor regulation of, 123
Percutaneous endoscopic gastrostomy, pump-assisted *versus* gravity-controlled enteral nutrition in, 216
Phagocytosis, arginine with sepsis and, 235
Phosphatidylinositol 3 kinase/Akt apoptotic signaling pathway, glutamine in experimental breast cancer and, 404
Prealbumin, nutritional screening in hospitals and, 389
Prednisone, BMI after liver transplantation and, 427
Presidential Address
Specialized Nutrition Support: The Pediatric Perspective, 160
Procalcitonin, enteral nutrition tolerance in critically ill patients and, 84
Protein, serum leptin levels in deprivation of, 132
Pulmonary emboli, IV injection of oral medication during parenteral nutrition and, 91

Respiratory quotient, from indirect calorimetry, clinical use of, 21
Resting energy expenditure
in children with cyanotic and noncyanotic congenital heart disease, 47
increases with end-stage renal disease, 36
Rhabdomyolysis, in short bowel syndrome, 305 (Letter)
Rhoads (Jonathan) Symposium Papers
Compounding TPN Admixtures: Then and Now, 433
Early Developments and Clinical Applications of Total Parenteral Nutrition, 291
History of Parenteral Nutrition, 225
Total Parenteral Nutrition, An Ally in the Management of Patients With Intestinal Failure and Malnutrition: A Long-Term View, 374
Rhoads Lecture
Clinical Aspects of Essential Fatty Acid Metabolism, 168

Sepsis, arginine and phagocytosis in, 235
Short bowel syndrome
experimental, 3–0 methylglucose absorption *in vivo*, 65
hypokalemia and rhabdomyolysis in, 305 (Letter)
Small bowel, keratinocyte growth factor and epithelial function after resection of, 198
Steady state, indirect calorimetry and, 16
Surgery
of digestive tract in newborn infants, nitrogen excretion after, 327
for gastric bypass, 156 (Editorial)
postoperative complications, preoperative albumin and site of, 1

Tacrolimus, BMI after liver transplantation and, 427
Total parenteral nutrition (TPN). *See also* Parenteral nutrition
compounding admixtures of, 433
concentrated, for critically ill patients, 208
early developments and clinical applications of, 291
hemorrhagic shock and glutamine in, 246
intestinal failure, malnutrition and, 374
Transplantation
nutritional autonomy after intestinal, 252
vitamin E assessment in cirrhotics before, 71
Triglycerides, particle size effects in lipid emulsions with, 58
Tyrosine, *N*-acetyl-l-tyrosine as parenteral nutrition source of, 419

Ubiquitin-proteasome proteolytic pathway, eicosapentaenoic acid modulation of, 105

Valine, muscle protein response to, 307
Vars (Harry M.) Research Award (2003)
Keratinocyte Growth Factor Improves Epithelial Function After Massive Small Bowel Resection, 198
Vitamin E, hepatic assessment in cirrhotics before transplantation, 71
Vitamin K, FDA requirements for inclusion of, 220

Weight, ideal, obesity classification and, 340
Weight gain, disaccharide malabsorption in piglets and, 323
